

Bhanu Teja Pashikanti

AI / Generative AI Engineer – Python, LLMs & Model Deployment

☎ +91 7386836602 | ✉ pashikantibhanuteja@gmail.com | 📱 bhanuteja.app | 🌐 Bhanuteja005 | in BhanuTejaP

SUMMARY

Python-first AI engineer who ships **GenAI to production** – LLM chatbots, **agentic AI** workflows, and computer vision – served as **REST APIs with Flask/FastAPI and TensorFlow Serving**, Dockerized on **Google Cloud**. IEEE-published in computer vision; used to turning client conversations into PoCs, MVPs, and live demos.

TECHNICAL SKILLS

Languages: Python (primary), SQL, JavaScript/TypeScript, Java

Generative AI & LLMs: OpenAI / Gemini / Claude APIs, LangChain, LangGraph, CrewAI, Multi-Agent Systems, RAG, Prompt Engineering, Function & Tool Calling, Structured Output, Embeddings, Vector Search (pgvector, FAISS, Pinecone), Chatbots, Evals & Guardrails

Traditional AI & ML: TensorFlow, Keras, scikit-learn, OpenCV, YOLO, Pandas, NumPy, Predictive Modeling, Computer Vision, Model Evaluation

Deployment & APIs: Flask, FastAPI, TensorFlow Serving (TFServe), REST APIs, Docker, Gunicorn/Uvicorn, CI/CD, Logging & Monitoring, Git/GitHub, Postman, Linux

Cloud & Data: **GCP** – Vertex AI, Cloud Run, Cloud Functions, Cloud SQL, BigQuery, Cloud Storage; **AWS** – EC2, S3, Lambda; **Azure** (working knowledge); PostgreSQL, MySQL, MongoDB, Firebase

PROFESSIONAL EXPERIENCE

InvisiEdge Marketing – AI / Backend Engineer

May 2026 – Present

Remote (US-based clients)

- Built an **agentic AI pipeline in Python** that ingests federal contracting opportunities from the **GovCon API**, uses **LLM extraction and summarization** to pull scope, eligibility, and deadlines into structured JSON, scores fit against client criteria, and auto-syncs qualified leads into **Pipedrive CRM** – removing hours of manual opportunity review each week.
- Developed a **conversational AI screening agent** that runs structured candidate interviews with an LLM, transcribes and scores responses against a role rubric, and returns ranked shortlists into client hiring pipelines.
- Shipped each AI service as a **Flask/FastAPI REST endpoint on Docker + GCP Cloud Run** with retry/fallback handling, prompt versioning, and token-cost logging; ran requirement calls, scoped PoCs, and **demoed MVPs directly to US-based clients**.

Altibbe Health Private Limited – AI & Full Stack Intern

Aug 2025 – Dec 2025

Hyderabad, India

- Engineered a **multi-modal AI verification system** for organic food authenticity, combining **LLM vision APIs** with **OpenCV** preprocessing to read product images, certifications, and metadata, reaching **92% accuracy** on real-time authenticity scoring.
- Served the inference workflow through **Python REST APIs** with data persisted in **GCP Cloud SQL**, and designed a **QR-based reporting system** used across B2B and B2C platforms – taking the product from **PoC to MVP to production**.

AI PROJECTS

Talented.ai – Agentic AI Recruiting | *Python, CrewAI, LLMs, RAG, Flask, MongoDB*

GitHub | Live

- Designed a **multi-agent system** (parsing, skill extraction, matching, scoring) orchestrated with **CrewAI**, using **LLM function calling and structured output** to turn raw resumes into validated JSON profiles – **85% accuracy, 60% less manual screening**.
- Implemented **RAG-based candidate–job matching** with embeddings and vector search, exposed through a **Flask REST API** with latency and token-usage logging.

LeadGen Copilot – LLM B2B Prospecting | *Python, LLM Agents, FastAPI, Docker, GCP Cloud Run*

Live

- Built an **LLM agent chain** that discovers target companies, identifies decision-makers, classifies roles and seniority from noisy web data, and verifies work emails at scale – replacing manual list-building for sales teams.
- Deployed as **Dockerized Python microservices on GCP Cloud Run** with a PostgreSQL store and a conversion analytics dashboard.

Real-Time Vision Inspection Pipeline | *Python, TensorFlow Serving, YOLO, OpenCV, Flask*

IEEE Paper

- Trained and exported a **YOLO / TensorFlow SavedModel** for automated violation and defect detection from live camera feeds, reaching **mAP@0.5 = 0.903**; co-authored and presented at **IEEE ICMLAS 2026**, Bangkok (**IEEE Xplore**).
- Deployed the model behind **TensorFlow Serving** with a **Flask gateway API** for frame ingestion, batching, and rule-based classification – the same serving pattern used for production-line visual inspection.

EDUCATION

B.Tech, Computer Science Engineering – Artificial Intelligence & Machine Learning

2022 – 2026

MLR Institute of Technology, Hyderabad, India – CGPA: 8.79

ACHIEVEMENTS & CERTIFICATIONS

- **First Prize – Innovation Challenge** (150+ teams, analytical AI solution); **ML Hackathon Runner-up** (top 1%); **SIA India 2024 Finalist**; **NPTEL Certified** – Data Structures & Algorithms.
